

Distilled water has had many of its impurities removed through distillation. Distillation involves boiling the water and then condensing the steam into a clean container.

APPLICATIONS

Use in machines when directed on instruction leaflet.

Product LIRMX010
Size 5L

INSTRUCTIONS

- Nowadays, most manufacturers recommend mixing 50% tap water with 50% distilled water and performing the 'calc-clean' process regularly to maximise the longevity of your equipment and keep it in tip-top condition.

TIPS

- Always follow manufacturer's instructions concerning the use of tap or distilled water
